ArtsPartners
of Central Illinois Inc.

March 31, 2005

To Whom It May Concern:

On behalf of ArtsPartners of Central Illinois, I would like to extend our organization's full support of the proposed Distinguished Scientist Lecture Series. Because our organization's entire philosophy is based on the notion that collaborative efforts build a stronger Peoria area, we feel this type of collaboration with the Illinois Heartland ACS will maximize community interest and involvement as well as build the type of community we feel Peoria needs to evolve into if it is to experience future growth and success - one that values innovation and creativity as a driving economic force.

Our organization will provide any and all assistance we can to maximize community interest. We will also do all we can to promote the day's activities to our arts community and encourage our arts community's participation, support and attendance. Further, we would be delighted to assist with speaker selection in the area of the arts so that the day's events have a nice mixture between the arts and sciences.

Because our community embraces the concept of Peoria NEXT, which is an entire community effort that is designed to build our city's future with innovative projects, we believe this endeavor proposed by the ACS and ArtsPartners will invariably build Peoria NOW. We are enthused about all the potential it can provide our area.

We look forward to hearing from you in the near future in hopes that you support our collaboration.

Sincerely,

Suzette Boulais
Executive Director
