

**L'ORÉAL USA FELLOWSHIPS FOR WOMEN IN SCIENCE PROGRAM**  
**2007 CALL FOR APPLICATIONS**

Now in its fourth year, the L'ORÉAL USA Fellowships for Women in Science program announces the 2007 call for applications.

Since its launch in May of 2003, the U.S. Fellowship program, which complements the company's international L'ORÉAL-UNESCO for Women in Science program has recognized and rewarded exceptionally talented young women engaged in breakthrough scientific research.

In the past, the highly selective postdoctoral fellowship program has awarded \$20,000 grants to each of five recipients annually. Beginning in 2007 however, the fellowship grants will increase in value to \$40,000 per recipient.

The L'ORÉAL USA Fellowships for Women in Science are awarded to women engaged in basic research in the life and physical/material sciences, technology (including computer science), engineering and mathematics.

Candidates who would like to apply may visit the L'ORÉAL USA Fellowships for Women in Science site at <http://www.lorealusa.com>, to obtain more information about program eligibility and requirements. Applications are available in downloadable and online formats.

The call for application period is from August 14 – October 31, 2006.
